

M10 PLASTIC HEAD BOLTS

GENERAL INFORMATION

These products are specifically designed for use with F, R and S type connectors. These bolts manufactured with special adhesive and thermoplastics to provide sealing and locking at the connection point. The dual micro-encapsulated adhesive is inactive until it is combined with the matching fastener. Upon interaction, the microspheres break off and react and form a strong chemical bond.

DIMENSIONS (mm)

* It should be stored between - 10°C and + 35°C and a maximum relative humidity of 65% and the 6-sided 22mm socket wrench should be used for assembly.
