

WINDSCREEN CLIPS

GENERAL INFORMATION

The windshield clips are specially designed products that provide electrical contact to the automotive windshield thanks to copper strips laminated on both sides and provide heating on the windshield thanks to this electrical contact. Thanks to its slim design, it takes up little space and provides ease of installation.

FEATURES

- ❖ Single or multi-pin connections of various lengths
- ❖ Various surface finishes are available (silver plating, tin plating, etc.)
- ❖ Lamination coating material and thicknesses can be applied according to customer request
- ❖ Adhesive versions are available for ease of installation
