

# M10-A2 STAINLESS BOLTS

## GENERAL INFORMATION

These products are specifically designed for use with P-type connectors. They are A2 stainless bolts manufactured with special adhesive to provide sealing and locking at the connection point. The dual micro-encapsulated adhesive is inactive until it is combined with the matching fastener. Upon interaction, the microspheres break off and react and form a strong chemical bond.

## DIMENSIONS (mm)

CODE	( L mm )
MEKN73000002	20
MEKN73000016	25

\* It should be stored between - 10°C and + 35°C and a maximum relative humidity of 65% and the 17 mm jaw wrenches should be used for assembly.
